UNIVERSITY OF SCIENCE AND CULTURE

In the three decades of its activities and after its quantitative development, institutionalization of curricular education, and promotion of doctoral research, University of Science and Culture moves on the path to entrepreneurialism. In line with advanced universities in the world aiming to educate and secure a part of specialized forces needed by society with a strong orientation toward entrepreneurship, the university aims to play a more active role in modern education, job creation, technology development, and creation of social values. University of Science and Culture is affiliated with the Academic Center for Education, Culture, and Research (ACECR), and consists of four departments: Education and Postgraduate Studies, Research and Technology; Students-Cultural, and Support, as well as five faculties: Engineering, Arts and Architecture, Humanities, Tourism Sciences, and New Media Technology and Science. University of Science and Culture has over 47 faculty members and 810 students. The university offers various courses and programs and offers scientific, educational, cultural, research, and entrepreneurship services to around 10,000 students.

Objectives
- Development of new and interdisciplinary fields tailored to the needs of society
- Development of knowledge-based enterprises and businesses
- Increasing the intended stakeholders’ value
- Identification and exploitation of social issues in the form of academic subjects and selecting and harmonizing education and research to solve current issues
- Completing the knowledge-based entrepreneurship (identification of opportunities, equipping resources, creation and growth) cycle with emphasis on graduate students

Innovation Cultural and Creative Industries Park
National Park of Sciences, Soft Technologies, and Cultural Industries of University of Science and Culture is the only specialized park in Iran in the area of culture. Taking into account the needs of the country, this park aims at developing cultural industries, commercializing soft technologies, and creating jobs in sectors such as culture, arts, handcraft, and tourism.

Specialized Training Center
Specialized Training Center of University of Science and Culture was established to address job creation, entrepreneurship, and promotion of human resources skills, and with the goal of training a specialist and expert force in four areas (arts, films, tourism, design, and development) with the help of designing, developing, and implementing courses required for students and employers the Center continuously undertakes needs assessment in order to meet the needs of ministries, organizations, and executive bodies (public and private). Then, applied-specialized courses are designed and developed based on the meeting needs, which eventually create jobs for the learners.

Institute for Sustainable Development of Tourism
The Institute for Sustainable Development of Tourism is a research center affiliated with the University of Science and Culture, which was founded in association with the Tourism and Hotel Management Faculty. The institute aims to develop and produce research on sustainable tourism in Iran, as well as contributing to the enhancement of tourism-related industries, destination branding, and health and medical tourism.

Foundation for Business
University of Science and Culture has facilitated the establishment of the National Park of Sciences, Soft Technologies, and Cultural Industries, which are crucial for the economy of Iran and the region. To this end, the Foundation for Business of University of Science and Culture was established to support and finance the development of knowledge-based businesses in the area of telecommunications, electronics, and telecommunications, as well as the establishment of new enterprises in the university.
